Job #1 - Warranty

COMPLAINT: THE KITCHEN GLASS WASHER IS LEAKING AND NEEDS FIXED.
CUSTOMER ADVISES THAT WHEN THE GLASS CLEANER IS UNDER PRESSURE, EITHER BY CITY WATER OR BY PUMP, IT CONSTANTLY HAS WATER RUNNING OUT OF IT. IF YOU TURN THE PUMP OFF, IT STOPS LEAKING.

CAUSE: Cup washer

CORRECTION: Brought unit in. Saw fresh tank had 1/3 in it. Turned on pump. When water pressure is present cup washer leaks water out opening where water comes through. Check valve in cup washer is bad. Parts request submitted for new cup washer. Received new glass clear. Removed water line from glass cleaner. Removed nut holding glass cleaner. Pulled old one out and place new cleaner in. Tightened down with nut and connected water line. Turned pump on and tested for leaks. No leaks found. Ran glass cleaner and checked for leaks while running. No leaks found
