	Complaint, Cause, Correction			
	Original Note : stephanie@dealer-advisors.com, 2026-04-10 14:28:31 :: Complaint: No 12 V out to the thermostat Cause: Issue was caused by the AC control board, has 12V and ground in. Pulled t-stat from wall, check for voltage, no voltage found. Pulled the return air grill off the ceiling assy and tested the connections for the thermostat and there was no power there. Contacted Lippert and was told that as long as there is 12V into the controller and nothing out the controller is bad and will need to be replaced. Correction: Replace controller - remove ceiling assy and wire all the 12V connections and 120V connections. Rewire the new one, plug everything in and test function
