Job #1 - Warranty

COMPLAINT: FLOOR DAMAGED

CAUSE: Slide caught loose vinyl

CORRECTION: During inspection of the flooring in the kitchen area, a significant tear and surface damage was identified in the existing vinyl flooring. The damage extended through the wear layer and compromise the integrity of the overall appearance of the floor requiring repair. see picture.

To verify operation and check for any interference, the slide was cycled in an out total of four times. During testing, the slide operated as a design and cleared the affected area each time with no signs of catching or additional damage. In order to complete the proper and seamless repair, replacement of the affected section of vinyl flooring is required. To ensure sufficient material for correct pattern alignment and full coverage during the patch process, an 8 x 15 section of matching vinyl flooring will need to be ordered. This will allow for proper fitment, trimming, and alignment to achieve a professional and durable repair
