 WO # Job # Description JOB INFORMATION

After running water and inspection of the faucet and drain i noticed that it was leaking. And they had the pipes not lined up and wasn't glued. So since the pipes wasn't lined up i had to put a 40 degree pipe fitting and mock it up and to cut my measurements on were to cut my pipe. Once I did that i used pvc primer and glue the connector in and tightened everything else up. Then i tested it for leaks. No leaks all good.
