Job #01 - Warranty

COMPLAINT: REFER LOOSE

CAUSE: NOT SECURED PROPERLY

CORRECTION: Upon PDI I found out the reefer was loose and noticed that the screw was broken. The reefer screw had broken the style and It needs to be replaced. The refer needs to be taken out of its location. In order to put a new style in I have to take out the furnace and disconnect the gas line along with any electrical wires. The fuse box also has to be unscrewed and wires have to be taken off in order to place a new style in. The wood around the style has to be taken apart in order to add a new style and needs to be screwed back into factory location. The furnace needs to be connected back up, gas lines and its electricity needs to be connected back up. The fuse panel has to be placed back into the factory location wires have to be placed back in and working order. Both the furnace and the fuse box has to be tested and in working condition. The refer has to be wired and screwed back in the factory location also test to be in working order.

The size of the style is 2 x 20 long.
