Job #1 - External

COMPLAINT: CUSTOMER STATES WATER HEATER WILL NOT STAY ON.

CAUSE: Customer States the water heater isn't working.

CORRECTION: filled the unit with fresh water and verified the pump is working I noticed that the bypass valves were turned to bypass the water heater . Turn the valves to the position for use .let the tank fill. Fired up water heater. Waited 10 minutes check for hot water availability at kitchen sink. Water was hot. Checked 120 ac voltage and it is working also.. the t and p valve have a slow drip so if recommend replacing that. I performed an LP pressure system drop test and it passed. I hooked my amp clamp to power feeding electric heating portion of the water heater and it's at 12.77 amps AC.wich tells us that the electric coil is properly being energized.

Job #3 - Warranty

COMPLAINT: ACTIVE RECALL SEWER TERMINATION BRACKET MAY FAIL

CAUSE: Recall for the black tank termination valve may fail

Customer #: 47940
HAGEMANN, JEFFREY R

CORRECTION: Clocked in and went to determine the location of the poly propylene plumbers tape we need to order it before I can complete the recall repair. The old bracket is holding , I will just need to install the plumbers tape when it arrives. Tape arrived and I installed using the instructions provided by manufacturer.
