WO #	Job #	Description	JOB INFORMATION
79686	1	CUSTOMER ADVISES THAT HE HAS NOT 120 VOLT POWER AT THE 2 OUTSIDE OUTLETS (TV & REFRIGERATOR) AND THE BATHROOM OUTLET. GFCI WILL NOT TRIP OR RESET. GFCI PLAUG WAS REPLACED FOR THIS PREVIOUSLY, BUT DID NOT CORRECT PROBLEM. No 120 to multiple outlets. Brought unit jn and plugged into shore power. Placed tester in all outlets not getting power and getting power to check which circuit the outlets were on. Checked connection and voltage at each outlet to check for voltage to see if wires were lose. When all connections check and snug in place removed gcfi that would not trip. Gcfi has power going to it but will not trip or rest. Replaced gcfi. Tested new gcfi and it still would not trip or reset. Grabbed another tech to check breakers. Outlets are tied to solar. Checked inverter prep to be wired together. Checked gcfi that had been wired same was as last gcfi. Wires were tied backwards . Ran wires correct way and power is restored to outlets. Placed wall mount back in. Ran gcfi back in and tested all outlets to be working properly. Placed all outlets back in place.
