WO #      Job #  Description          JOB INFORMATION
*****
79706     1      THE GREY TANK DOES NOT READ FULL REGARDLESS OF FLUID LEVEL.
          Filled grey tank until it backed up into the sink. The tank reads
          2/3 full. Opened the underbelly and inspected the wires and diode
          pack. When I jumped the full sensor it read on the panel. Drained
          the tank. Installed a new sensor and filled the tank up again. The
          panel still doesn't read full. Replaced the diode pack and the
          panel still doesn't read full.
          After i filled the tank until it backed up in the sink, the next
          day the sink was empty. Filled it up again until I saw water in
          the sink. Now the tank reads full. Taped up underbelly and
          drained the tank..

79706     4      THE SILICONE NEEDS TO BE TOUCHED UP.
          Gaps in silicone
          Applied silicone as needed to gaps around water heater and
          compartment door.

79706     3      THE DOORS ABOVE THE SINK ARE RUBBING
          The cabinet doors are hitting each other.
          Moved doors away from each other with a hammer.
