COMPLAINT: THE GREY TANK DOES NOT READ FULL REGARDLESS OF FLUID LEVEL.

CAUSE: Filled grey tank until it backed up into the sink. The tank reads 2/3 full. Opened the underbelly and inspected the wires and diode pack. When I jumped the full sensor it read on the panel. Drained the tank. Installed a new sensor and filled the tank up again. The panel still doesn't read full. Replaced the diode pack and the panel still doesn't read full.

CORRECTION: After i filled the tank until it backed up in the sink, the next day the sink was empty. Filled it up again until I saw water in the sink. Now the tank reads full. Taped up underbelly and drained the tank..
