Job #1 - Warranty

COMPLAINT: CUSTOMER ADVISES THAT THE TONGUE JACK IS NOT FUNCTIONING.

CAUSE: Pulled unit up to shop and removed the tongue jack switch. Switch tested good. I'm getting power to the jack. The fuse is good and the light is functioning. The jack is inop.
Tongue jack

CORRECTION: Brought unit in and placed on jack stand and removed bolts from jack. Removed box cover on circuit breaks and removed power wire for jack. Pulled old jack out and placed new one in place. Tightened down with new bolts. Ran wire to junction box and added eyelet to wire. Placed wire in place and tightened down. Placed cover back on and connected wire harnesses for jack. Checked light and it turned on. Went to level system and turned on to operate jack. Jack works. Leveling system showing fault. Plugged into shore and retracted other jacks and fault fixed itself. Placed cover back on junction box
