WO #	Job #	Description	JOB INFORMATION
79617	2	24V771 SOFT START ON GE A/C Retrieved lift and took drill and recall info up to rooftop. Removed the rear shroud and determined there is a recalled soft start on it. Couldn't remove front ac shroud because the solar panel is mounted directly next to AC. You can tell the Solar was installed 1st and then the manufacturered assembled AC was after due to the placement of the Solar mounts and shroud screws. The inside AC mount bolts and ring would have to be dropped to replace the AC Soft start. I did notice quite a few voids while on the roof so i took pictures for writer to inform the customer.
