	Complaint, Cause, Correction			
	Original Note : bhoffman@americanrvcenter.com, 2026-06-03 16:54:13 :: CUSTOMER HAS WATER LEAKING FROM UNDERBELLY. NOT SURE WHERE IT'S COMING FROM. CUSTOMER SHOWED BJ PICTURE'S OF WHERE WATER IS COLLECTING. IT IS CAUSING THE UNDERLAYMENT TO SAG DOWN AT THE REAR OF THE TRAILER. SEE BJ IF YOU HAVE QUESTIONS ABOUT LOCATION OF WATER No glue Connected the garden hose to the black tank flush. Unscrewed the screws from the underbelly. Turned on the water but couldn't find a leak. Turned off the garden hose and closed up the underbelly. Connected the garden hose to the city water connection opened the shower and bathroom sink but no leak. Opened the faucet at the kitchen then seen water leaking thru the underbelly near the exterior wall. Took pictures. Opened the door to the bathroom sink and unscrewed the access panel. The kitchen sink drain pipe connects under the bathroom sink. Found the kitchen drain pipe was not glued to the bathroom sink drain from the factory. Applied plumbing cement to the drain pipe then pushed the pipe from the kitchen drain into the bathroom drain pipe. Let the cement set for 5 minutes then turned on the water at the kitchen sink and checked for leaks. No leaks occurred after. Screwed the access panel back under the bathroom sink.
