Job #1 - Warranty

COMPLAINT: UNIT HAS NO POWER TO THE THERMOSTAT. REST OF UNIT HAS POWER

CAUSE: Pulled unit up to shop and hooked up to shore power. Opened slide room. Checked all fuses in the breaker panel. Pulled the face of the t-stat off and checked for voltage. There is no 12volt power going into the t-stat. Removed the filter cover and mounting screws for the controll box. Checked all connections and found the clip for the power wires was barley loose.

CORRECTION: Pushed the clip into the circuit board and i now have power to the t stat. Installed cover and filter. Secured t-stat cover. Cleaned up tools and closed the slide room.
