Complaint: Four slides are not coming in or out, awnings are not extending

Cause: CompFail After several phone calls with Jayco and BMPRO, I was instructed to remove all wiring from slide out and awning outputs on mini node. Only 8.0V output when using ground on output terminal. 13.9V when using isolated ground. Had to access and verify all wiring for all slide motors and awning motors by request of BMPRO.

Correction: After several hours of diagnostics, it was agreed that the mini node has a bad ground output to slides and awnings. Replace entire mini node.

Complaint: Kitchen slide that has dinette table on it is lifted off the floor a bit

Cause: NoFail Setup slide, found that is was working as designed.

Correction: This is designed to float above the floor a little bit, asking for time to setup and operate slide to diag if there was an issue.
