1. 12V Furrion refrigerator. Turned it on and let it run, then came back to check it. Temps in freezer and fridge compartments were the same, approximately 76 degrees. Removed from unit to access the backside for further testing. Hooked up to good 12V power. Performed and filled out warranty checklist. Took pic of sheet and tags of refrigerator.

1. Unit is portable solar prepped, so would just need the solar panel set up. If the customer would like roof mounted solar with a controller, would require more labor as there is no set up inside unit for that. Roof could hold 2 panels. Wires would have to be run from solar roof hookup to controller, from there to battery. 3hrs estimate
