WO # Job # Description JOB INFORMATION

80134 1 A/C ISN'T COOLING. CHECK WARRANTY case number00258451
 Pulled unit up to shop and hooked up to shore power. Turned on the air conditioner. Removed the filter cover and removed the controll board cover. There are 3 led lights that are flashing very fast and are not flashing in a way that represents a code. Tried resetting the control board by removing twelve volt and a hundred and twenty volt power. This did not change anything. The amp drawl on the compressor is only six amps as well. Filled out a warranty sheet and gave to the warranty department. Ac Went inside and disconnected wires and wired harnesses for ac. Removed lag bolts for ac. Removed cover and grabbed lift with new ac. Went to roof and pulled old ac off and placed new ac on roof. Placed plenum on and ran lag bolts through. Tightened down to 40in lbs spec per manufacturer. Wired everything together and closed control box. Tapped were it was need and turned on ac. Let ac run over night to make sure it cools. New ac cools. Placed cover back on and closed unit up.
