WO # Job # Description JOB INFORMATION

80196 1 REAR TOP LEFT RUNNING LIGHT NOT WORKING FULL OF WATER
Rear running light doesn't work properly
On inspection of the lights i seen this one wasn't working
properly so I took the cover off and it was 1/2 full of water. So
I replaced it with a new one and sealed it up with clear
silicone. And the new one works properly

80196 3 WATER HEATER LEAKING
Water heater leaking
On my inspection found that the water heater was leaking when in
used. So I pulled the water heater from camper. And found the
leak. I tightened up the fitting on the inside of the water
heater and the leak stopped. But to get to the leak I had to
take the cover off water heater to get to it. So then I put the
cover back on and put new cone washers on the hot and the cold
lines and connected the wires back. And tested it no leaks. Got
the door put back on and sealed it up. Good to go
