Job #01 - Warranty

COMPLAINT: SLIDE ROOM VIBRATING

CAUSE: Slide rail and gears had no lubricants

CORRECTION: Running the slide in and out during the SFD found was making a lot of noise in a tremendous amount of vibration

Examine the gears slide rails, found them to be exceptionally dry very little lubrication verified that there were no obstructions no damage on the slide rails on the through frame slide

Started with food grade silicone, lubricated the rails gearbox. The vibration didnt change. The noise did not change.

Used a different type of lubrication called slick stuff lubricated the slide rails gears, Rast bushings

Ran the slide in and out several times the vibration stopped. The noise stopped. The slide began operating smoothly and correctly. This job is now complete.
