Job #2A - Warranty

COMPLAINT: SPLENDIDE WARRANTY
DRYER MAKES NOISE

CORRECTION: turned on the dryer and began running the dryer could hear a clunking noise every time the drum made one complete revelation

Contacted Chris the shop Foreman talked to a rep from the manufacturer of the dryer.

The lid was removed off the top of the dryer, began turning the drum by hand until the clunking noise was heard continue to rotate it to look for the rub marks on the drum itself and found the seam on the drum from about midpoint on the drum to the front of the dryer. Were sticking up about a 16th of an inch and rubbing on the sidewall of the dryer.

I stuck my hand between the drum and the right side wall of the dryer since it was not rubbing on the left side press, the outer scan outward, then began running the dryer with electricity and found that it was no longer rubbing

A video and pictures were both taken depicting the noise that the dryer was making where the drum was rubbing on the drum itself. There was no way to get a photograph of the side of the dryer itself on the inside. Its too tight.

After completing this, the lid was placed back on the dryer. The dryer was then plugged back into these receptacle in the washer dryer closet lifted back into place. The dryer hose pushed back through the wall again dryer was sat down, locked into the clips on top of the washing machine reattach with screws.
