WO #	Job #	Description	JOB INFORMATION
80753	6	SPRAY PORT HOT SIDE WILL NOT LET ANY WATER OUT	Spray port no hot water On inspection of the spray ports i found that we couldn't get hot water through the spray ports. They had the hot check valve going the wrong way on the hot side. So I flipped it around and then the hot side of the faucet would not shut off. So I put a parts request in for a new spray port faucet. Got a new spray port faucet and installed it with 5 new cone washers and tested the system and it works properly shuts off like it is supposed to. Good to go
80753	4	THE AWNING SWITCH ON THE CONTROL BOARD IS BACKWARDS	Awning switch is going wrong direction On inspection i found that when I pushed the awning button to extend it retracted and when I hit the retract it extended. So I took the cover off and flipped the switch so the direction was going correct
80753	5	WATER PUMP IS SURGING	Water pump surging So in inspection of my water pump when it was running it would surge. So I took the cap off the end of the water pump and used a Allen wrench and adjusted it until it would not surge. Water pump works properly now
