WO #	Job #	Description	JOB INFORMATION
81312	1	CUSTOMER ADVISES THAT THEY HAVE NOTICED WATER LEAKING FROM THE FRESH TANK AREA. CUSTOMER HAS NOT PUT WATER IN FRESH TANK, BUT WE DID DEWINTERIZE UNIT. Fresh tank Crack in the spun weld Brought u it in. Connected to fr3sh tank fill and tried to fill. Noticed a leak coming from fresh tank itself were it has split. Parts request submitted for fresh tank. Unscrewed the drain valve from the tank. Disconnected the water lines and sensor wires. Unbolted the tank support from the frame. Untied the straps from the tank. Had to grind off the screws from the support to get the tank out. Pulled out the fresh tank then swapped over the fittings with new sealant. Set the tank up under the camper and bolted the support back together. Connected the water lines and sensor wires. Filled the fresh tank and checked for leaks and tank level. Drained the fresh tank after.
