Job #01 - Warranty
COMPLAINT: USB port behind the couch has no power

CAUSE: unknown

CORRECTION: During the PDI found the USB port behind the couch has no power
Did unscrew the USB port pulled the wires up as far as they would pull up was able to get limited access to the quick connects found there was no power in the quick connect itself
In order to properly repair the USB port, the inside of the cabinet will have to be pulled removing two pieces of paneling. They overlay each other in the wrong direction in order to gain access to the actual wire harness coming into the USB port and begin inspecting the wire itself and locate the issue, it may require further disassembly of the cabinet into the floor to find a possible pinched or cut wire.
Will request one hour labor job on hold for approval
