WO # Job # Description JOB INFORMATION

71286 1 DRAIN PIPE GOING TO THE GREY TANK FROM THE WASHER IS LEAKING BY
 THE HITCH PIN
 Pulled unit up to shop. Removed door and door frame. Removed
 mounting hardware. Removed dryer off of washer. Secured a piece
 of batten stip on the bottom of the door frame to prevent
 damaging trim. Removed washer. Removed false wall to access drain
 pipe. Ran water through drain. Water is coming out of vacuum
 breaker. The pipes are too far apart and aren't straight. This
 has caused the vacuum breaker to pull apart and break. There is
 no room to adjust pipe going through the floor. Need to cut out
 area so I can position pipe. Took multi tool and cut floor around
 pipe. Cut pipe in front compartment to pull apart pipe. Received
 new part. Installed vacuum breaker to pipes. Went in front
 compartment and cleaned up pipes where I cut them. Installed a
 union with all purpose cement. Let dry. Took one of the water
 lines and ran it through drain line. No leaks present. Cleaned up
 area. Installed washer and water lines. Installed dryer duct and
 dryer to washer. Installed door frame and trim. Installed door.
 Tested for power in appliances. Cleaned front of washer and
 dryer. Cleaned up area in bedroom.
