Job #1 - Warranty

COMPLAINT: DRAIN PIPE GOING TO THE GREY TANK FROM THE WASHER IS LEAKING BY THE HITCH PIN

CAUSE: Pulled unit up to shop. Removed door and door frame. Removed mounting hardware. Removed dryer off of washer. Secured a piece of batten strip on the bottom of the door frame to prevent damaging trim. Removed washer. Removed false wall to access drain pipe. Ran water through drain. Water is coming out of vacuum breaker. The pipes are too far apart and aren't straight. This has caused the vacuum breaker to pull apart and break. There is no room to adjust pipe going through the floor. Need to cut out area so I can position pipe. Took multi tool and cut floor around pipe. Cut pipe in front compartment to pull apart pipe. Received new part. Installed vacuum breaker to pipes. Went in front compartment and cleaned up pipes where I cut them. Installed a union with all purpose cement. Let dry. Took one of the water lines and ran it through drain line. No leaks present. Cleaned up area. Installed washer and water lines. Installed dryer duct and dryer to washer. Installed door frame and trim. Installed door. Tested for power in appliances. Cleaned front of washer and dryer. Cleaned up area in bedroom.
