WO # Job # Description JOB INFORMATION

71398 1 CUSTOMER ATTEMPTED TO FLUSH OUT THE BLACK TANK. THE WATER DID NOT
GO INTO THE BLACK TANK, BUT IT DID START RUNNING OUT FROM THE
UNDERBELLY.

Water not connected

Follow the line from the Black tank flush connection down to the
tank and found that the connection was not connected to the black
tank. Took pictures along the way. Remove the screws from the
underbelly And did find that the line was not connected to the
black tank. Screw the line fitting back to the tank and checked
with water pressure to make sure it was not coming off and no
leaks. Found no cause of why line was off. Put the underbelly
back up and put the screws back in.
