Job #1 - Warranty

COMPLAINT: SLIDE ROOM IS STUCK AND NOT MOVING THE BACK SIDE WANTS TO MOVE AND THE FRONT DOES NOT

CAUSE: Slide room is stuck on the front side. Have power going to motor. Motor is running and timing out because the slide rack is broken. When I tried to run the slide out it made a very loud pop. Advised that we replace the slide assembly. Slide assembly was approved. Pulled unit into bay. Hooked unit up to shore power. Ran slide out as much as I could. Removed seals. Removed mounting screws. Took a heat gun and warmed up geo cell so I could removed assembly from wall. Removed screws from gear rails. Couldn't get to the screw behind the bottom. Drilled out access hole. Removed screw. Removed motor. Removed slide assembly. Got new assembly and installed gear rails. Secured assembly to slide room. When trying to secure slide assembly to the wall the other side pulled out away from the blocks. Had to removed the rear slide assembly to get this back together. Removed assembly. Installed gear rails, secured to slide. Installed motors. Secured to wall with screws. Drilled out holes where the bolts go through slide assembly since the original holes do line up. Taped off sides. Sealed with silicone. Sealed facia trim, with silicone. Installed inside hardware and trim after removing staples. Installed bulbs seals on inside and outside. Cleaned up mess.

CORRECTION: .
