COMPLAINT: FRESH TANK IS LEAKING UNDER UNIT

CAUSE: Fresh tank crack

CORRECTION: Got the garden hose and filled the fresh tank 1/3 full. Inspected around the underbelly for water leaks. Took pictures of the fresh tank leaking before the underbelly was pulled down. Pulled down the underbelly and found what appears to be a crack in the fresh tank. Circled the leak with a blue sharpie. Took picture of numbers on the tank. Drained the water from fresh tank. Put the underbelly backup. Waiting on warranty. Received new fresh tank. Removed the underbelly below the fresh tank. Disconnected the water lines and sensors. Unbolted the bolts holding in the tank. Dropped out the fresh tank. Placed and bolted in new fresh tank in the underbelly. Hooked up the water lines and sensors. Filled fresh tank 2/3 full to check for any leaks. No leaks. Took pictures. Drained the fresh tank since it was winterized.
