COMPLAINT: BLACK TANK FLUSH DONT WORK

CAUSE: black tank flush

CORRECTION: tested black tank flush and no water to tank,checked under sink and tracked water lines and foundvacuum breaker was hooked up backwards,had to cut both lines and change fittings so it would work,tested flow through vacuum breaker and it was working right,when i hooked up other side it was not getting to tank,cut underbelly in several places and found white water line was kinked in half and leaking,pulled line through floor and cut out kink,then spliced in line to vacuum breaker and test again,now im getting water to tank,taped up underbelly where i cut and tied up lines and vacuum breaker and put panel back in place.
