WO # Job # Description JOB INFORMATION

74757 1 WATER HEATER IS NOT WORKING NOT WORKING ON GAS
The control board for the water heater is burnt, I found that the blue wire going to the touch pad is shorted in the trailer some where. Best thing to do is cap wire off and run new wire from water heater to touch pad In bathroom. Wires ground out Received the new thermostat and control board for the water heater . Unscrewed and unplugged the control board from the water heater . Put the new control board in then put the screws back in and plugged in . With checking contuity on the wires from the water heater to the thermostat , both wires had contuity but was disconnected from the water heater and thermostat . Dropped the underbelly and the lp line on the doorside . Ran new wires from the water to the thermostat thru the underbelly . Connected the wires at the water heater and thermostat then tested the water heater for hot water . Put the underbelly back up then mounted the lp line back up . Took pictures of the process .
