WO # Job # Description JOB INFORMATION

74999 1 FURNANCE WILL NOT LIGHT
furnance not kicking on
turned on thermostat and fan would run but it would not
ignite,checked 12 volt and i had power coming into board but no
power going to sail switch,replaced board and it works now.also
thermostat was working backwards,come to find out it was
installed upside down,turned around and it works fine
now.installed orginal board back in to check and it works
now,thermostat was hung upside down with cover the right way,so
everything was backwards so that explains why it would not work.
