Job #1 - Warranty

COMPLAINT: TRAILER LIGHT FAULT TAIL LIGHTS ARE NOT WORKING ON THE RIGHT SIDE
PASSANGER SIDE

CAUSE: right turn signal not working

CORRECTION: hooked up box and it blew fuse, took out both rear lights and tested, brown wire going across to pass side was bad, because we ran wire outside and it would work hook wire to wire and pulled through wall new wire, hooked up and it worked, put lights back on and tested again, it quit working again, took lights out again and found on driver side rear brown wire was stuck and when you moved it it would work off and on, drilled hole in bottom and ran new brown wire through wall and hooked up, wire had to have staple in it, tested light and it works now without blowing fuse, installed lights back in place and siliconed, all good.
