Subtotal for Job #SUMMER: 0.00

Job #2 - External

COMPLAINT: DOUBLE CHECK TO MAKE SURE UNIT IS NOT BUSTED CUSTOMER LET UNIT FREEZE

CAUSE: Check the unit has got any busted lines...

CORRECTION: discovered water on floor in unit after running slideroom out. Water came from when slideroom goes out it leans in that direction and condensation from roof puddles over onto the slideout roof. Then the tongue jack was up higher then level which allowed for puddled water on slideout to roll down the back wall of slideout and down the swintech track and back into the units floor. Recommend to set Stabilizer Jacks and level unit before running the slideout.
