Flat Rate Code: 18006 12 VOLT - GENERAL REPAIR

Fault Code: IMPROPERLY INSTALLED

Serial #:

Model #:

Notes:

Problem: GROUND FOR BAL CONTROL BOARD WAS NOT CRIMPED INTO RING TERMINAL AND FELL OUT

Time Requested: .4

Cause: Bad ground connection

Time Allowed: .4

Remedy: Tested for 12v at the control box, had 12v on the red wire but had no ground. Grounded my meter to the camper and checked for 12v at the red wire and there was power. When checking for power at the control box on red wire and black wire there was no 12v power. Traced down the ground and found it sitting on the self tapper. The ground wire had no terminal end. Unscrewed the self tapper. Crimped on a terminal to the ground wire. Smashed the ground terminal between 2 washers and screwed down then test the jacks again.

Sublet Repairs: 0.00

Part Return Req: No

Status: Approved
