Job #1 - Warranty

COMPLAINT: GROUND FOR BAL CONTROL BOARD WAS NOT CRIMPED INTO RING TERMINAL AND
FELL OUT

CAUSE: Bad ground connection

CORRECTION: Tested for 12v at the control box, had 12v on the red wire but had no ground. Grounded my meter to the camper and checked for 12v at the red wire and there was power. When checking for power at the control box on red wire and black wire there was no 12v power. Traced down the ground and found it sitting on the self tapper. The ground wire had no terminal end. Unscrewed the self tapper. Crimped on a terminal to the ground wire. Smashed the ground terminal between 2 washers and screwed down then test the jacks again.

Labor

Code	Description	Mechanic	Total
Z990	MISC LABOUR CODE (EXTERNAL)	SAR	74.00

Subtotal for Job #1: 74.00

Parts Total:	0.00
