Job #1 - Warranty

COMPLAINT: CUSTOMER ADVISES THAT THE REFRIGERATOR WILL ONLY RUN ON SHORE POWER. IT WILL SHUT OFF AS SOON AS SHORE IS DETACHED.

CAUSE: Pulled unit into shop. Plugged into shore power. Checked the fuse for fridge. Verified that the fridge is working on shore power. Turned off battery disconnect and unplugged shore power. There is no 12 volt going through the unit. Located battery disconnect box. Removed cover. Checked for any obstructions. Checked all fuses and connections. Installed cover and checked the switch. Went inside, and the 12volt system is working.

CORRECTION: The battery disconnect was not making contact when is was in the on position. Tested switch several times. Fridge has power when unplugged from shore power. Tested fridge for 4hrs without any issues. Closed unit and parked.

Labor

Code	Description	Mechanic	Total
Z990	MISCELLANEOUS REPAIR	ZMS	10.80
