Job #1 - Warranty

COMPLAINT: FRIDGE NOT WORKING NOT GETTING COLD

CAUSE: Fridge quit running

CORRECTION: Plugged in the camper and let the fridge cool overnight. Put thermometers with antifreeze in the fridge and freezer. Temp was at 80 degrees the next day in both. Unscrewed the fridge from the cabinet and checked the voltage of 13.7 but had no amp draw. Inspected the control board and it had look like the compressor got hot enough to melt the plastic of the control board. The light comes on in the fridge. Put in po for a new fridge.
