Job #1 - Warranty

COMPLAINT: CUSTOMER HOOKED HOSE TO THE BLACK TANK FLUSH AND WATER RAN OUT OF THE BOTTOM OF THE TRAILER. CUSTOMER WILL BE WAITING.

CAUSE: Loose hose to black tank connection on the backside

CORRECTION: Connected a hose to the black tank connection, had another tech turn on the water while inspecting the the backside where the vacuum breaker is at. Water was coming out between the hose from the vacuum breaker to the black tank connection. The hose to the black tank connection was not tight so when a hose was connected to the exterior side of the black tank connection water would fall down inside the wall into the underbelly. Tightened the hose to the backside of the black tank connection and water stopped leaking.

Subtotal for Job #1: 92.50

Job #2 - Warranty

COMPLAINT: CUSTOMER ADVISES THAT THE AIR CONDITIONER WILL BLOW AIR, BUT IT IS NOT COLD AIR

CAUSE: Compressor not running

CORRECTION: Plugged in the shore power then powered on the ac to cool for 15 mins. Ac started a little cool but put out hot air while running. Tested the mf, amp draw, voltage and filled out the paperwork. Took pictures of the process. Put in po for a new ac.
