WO # Job # Description JOB INFORMATION

77129 1 UNIT IS ON THE SHOWROOM. EVERY MORNING WHEN IT IS PLUGGED IN, THE
LIGHTS WORK FOR A WHILE AND THEN THEY START TO GET DIM AFTER A
WHILE. YOU CAN HOOK UNIT TO A JUMP BOX AND THE PROBLEM GOES AWAY
No 12 volt through the entire unit.
Unplugged the unit from shore power to rest system. Turned
disconnect to off. Flipped all breakers to off. Plugged in
unit, flipped breaks to on position. Still no 12 volt power.
Removed cover and tested converter output. Converter is putting
out 13.65. Removed panel next to battery disconnect switch.
Inspected wires and breakers. During inspection i noticed the
wire leading to the battery disconnect is loose on the re-setable
breaker along with all of the nuts on the other breakers.
Removed mounting screws on breaker. Had to cut onto the wire
terminals because it was welded to the post. Removed breaker.
Installed new wire terminal. Received new breaker from parts.
Installed wires onto breaker and secured it to the wall.
Tightened all other wires on breakers. Plugged in unit and turned
on all breakers on panel. I now have 12 volt going through the
unit it. Installed cover panel on breaker and fuse box. Installed
access panel next to disconnect switch. Labeled breaker and
placed in warranty department. Typed notes.
