Line# 1	Operation Code	Operational Description		
	RC-672-03-00-004252	22V729, 2022-556 - HOLDING TANKS - INSPECTION AND REPAIR - Recall/Water Tank/Install/No Tread Code		
	Complaint, Cause, Correction			
	Original Note : bhoffman@americanrvcenter.com, 2025-10-24 16:16:00 :: RECALL ON HOLDING TANK Fresh tank strap recall Im not sure if there is/was a underbelly panel here at the fresh tank but tank is full and sagging a good 6in beyond the frame. Drained the tank, had to use a board a a jack to rwise the tank for the majorityof the water to drain. Removed the screws that held up the next panel towards the the front to expose the cross frame. Had to predrill holes in the straps backend where the crossmember instructed to mount strap because the axle was in the way and the corner brackets on fresh tank was mounted lower then the frame which made it harder to drill and installed self tap screws into frame. Had to use jack with board to hold the strap and push fresh tank upwards so support straps would reach frame on both end. Repeated the process on other 2 straps. Reinstalled underbelly.
