WO # Job # Description JOB INFORMATION

77501 1 THE AIR CONDITIONER THERMOSTAT IS READING AN F1 CODE
Two of the cables for the air conditioner unit were not hooked up
to the control board.
I removed the lower platem. Opened up the control board box and
found that the data wires were not hooked up to the control
board. The harness had been left inside the upper air conditioner
unit. I pulled the harness down and plugged it into the control
board. I tested the air conditioner, and now it is working as it
should.

77501 2 CITY WATER CAME OUT OF THE BACK WALL
The water ports on the back wall only had 2 screws holding them
to the wall. They had been mounted off center.
I removed both water ports and added putty tape behind the ring.
I then shifted the port to the center of the hole. I screwed the
ports back to the wall and sealed them up.
