Job #1 - Warranty

COMPLAINT: 23-439 Fuel Pump Controller Recall

The remedy is to protect the fuel pump controller from the elements of weather by installing a plastic cover on the back side of the skirt metal, and to make sure the circuit is protected by a 15 amp ATC fuse at the power source. If the circuit is not protected by a 15 amp fuse add an inline fuse like KRV# 696343- Fuse -Holder - 15 Amp - 10 Ga - W/P - w/15 Amp Fuse - Optifuse - LPR-03BL - 10BL - 15A - DC - Blue. Please see the attached Safety Advisory for complete details.

CAUSE: Sent parts request for a new fuel gauge and cover.
Fuel pump controller recall

CORRECTION: Got the part in and hooked up and the plastic cover put on the under side and spray foamed the top and put budle tape on the cover. And works properly now
