77829 1 GREY TANK NOT READING ON MONITOR
Grey tank not reading
During pdi i noticed grey tank was not reading. Checked to make
sure all terminals were were getting power. Checked ground to
make sure it was getting a good read. Found tank wire and
followed all they was to make sure there was not a cut
anywhere.checked voltage at each terminal when able to get tester
to terminal, normal voltage. Took cover off of control board to
check voltage at wire on board. Normal voltage.Tested resistance
at tank wire brain. Could not reach actual senors because they
are pushed against frame. Tried to get to ground but it is in
difficult to reach area. Brain had ressistance on all three
wires. Believe ground had been inserted into tank wrong to were
it cannot read. Ran new ground into tank. Drilled hole and then
added terminal for new ground. Ran tank unitl full to check all
sensors tombe working. Crimped wires back together
