Job #1 - Warranty

COMPLAINT: CUSTOMER ADVISES THAT THE AIR
CONDITIONER IS NOT COOLING
THIS SHOULD BE UP FRONT WHEN WE GET
HERE

CORRECTION: Opened unit and plugged up Shore
power. Turned on AC and measured temp
and it was 72 on both side (Return and
Register). Removed inside cover and
opened Control box and found multiple
wires not in clips and plugs properly.
The 12v Power plug was arcing when i
opened the box and also the 120v wires
in the Wago clips were stripped back to
far... i shorted and reinstalled wires
properly. Fuse was blown in the Furnace
slot... replaced it. Checked Amps at the
Black Compressor Wire and only have
7.8A. Got a Warrenty Chechlist from Ben
and filled it out.

Job #2 - Warranty

COMPLAINT: CUSTOMER ADVISES THAT THE SOLAR PANELS ARE NOT CHARGING

CAUSE: Plug at on roof from panel wasnt making contact efficiently.

CORRECTION: Moved a bunch of wood blocks to Pull cover panel to get to Charger Controller. Tested
both Continuity and voltage at Solar Wires, no Continuity or Voltage. Had to remove Charger Controller
from wall to get to the set screws that hold Solar Wires in place... screws were stripping and over
tightened... finally got them broke loose. Went up to roof to Solar Panel and visually inspected it, found no
visual damages. Retrieved Air hose to blow standing water off Plug port and and cut dicor loose from the

plugs. Retrieved tool to remove plugs from base and checked for Voltage and Continuity, one plug wasn't fully connected, removed plugs and tested... 17.6v and Continuity. Reconnected the plugs. Came back down to the Wires at Charger Controller and checked Voltage again and have between 2 and 5v. Opened my Bay door, disconnected Shore Power and checked Voltage again and 12.9 coming from Solar. Issue was at the Plugs on roof not being fully connected or shorting, but I couldn't replicate it not working after reconnecting Plugs. Reinstalled Cover over the Solar Charger Controller and picked up my tools.

Job #3 - Warranty

COMPLAINT: THE MICROWAVE DOOR FOGS UP. MAKE SURE THE RUBBER MAT IN THE MICROWAVE STAYS WITH THE CAMPER !!!!!

CAUSE: No issues found with microwave

CORRECTION: Ran a cup of water for 3 minutes in microwave and naturally steam was created but nothing out of the ordinary. There is no damages to inner door or where door seats. I don't see an issue with the microwave. I noticed their plastic plate cover inside microwave which when heat traps in cover its gonna create its own HotBox and create extra steam.
