 Original Note : bhoffman@americanrvcenter.com, 2025-11-18 08:51:17 :: BEDROOM SLIDE WILL NOT CLOSE I winterized the unit and as i was closing up the unit, the Bedroom slideout did not retract in. Checked the switch and it has 12v power and power both ways on switch. Removed cover board under bed and motor panel. The motor is unplugged and currently hunting down the other end of plug...located the control box on the outside corner of the bed mounted carpet area by removeing the facial of carpeted platform. I found a small white wire pinched in between 2 metal brackets. Spoke with Ben in regards to my findings. need to change the wire that is pinched and slide controller
