Job #PDINTT - Internal

COMPLAINT: PDI - NEW TRAVEL TRAILER

CAUSE: New pdi

CORRECTION: Brought unit in. Attached battery box to unit and put in drain holes. Put battery in and connected to unit. Removed lp tanks and put on lp cart. Tanks were vacuum purged and filled both tanks. Brought tanks back inside and attached back to unit. Torqued each set of lug nuts to 110ftlbs. Aired all tires including spare to 75psi. Checked breaks on both sides of camper to be working as well as ebrea. All clearance and break lights work. Grabbed serial and model number off range, fridge, and microwave. Microwave and range work. All outlets work. Gcfi works. Trip tested gcfi and it worked. CO2 detector worked. Smoke detector works. Bathroom fan works. Furnace works. Water heater works. All water points work on city. Control board works and shows levels on tanks. frsh tank fill works. Water pump works. awning lights work. Range fan and light works. All interior lights work. All windows and blinds open and close properly. Grabbed test tv and connected to booster. Turned booster on and checked for reception. Picture and sound came through on tv. Tried to run lp drop test but regulator bottomed out. Checked 12v system. Unplugged unit from shore power. Control board works. Awning still goes in and out. Awning lights come on. Interior lights come on. Lp decetor still works. Fridge still works. Range lights still work. Pump still works. Interior looks good. Inspected all doors to be scratch free. All drawers and cabinet doors scratch and dent free and open and close properly. Futon fold out works. All fabric is in good condition. Company decals added. Exterior looks good. No scratches or dents found. All seals are in good condition with no voids. Step adjustments work. Front steps come out and fold in well. Stabilizer jacks work well. Goes down and support weight well. Runs back up smooth. Ran lp drop test. 13wsi at start. Adjust 50% to 11wsi. Lock up stops at 13wsi. Leak test ran at 8 wsi for 5mins. Unit passed.
