WO # Job # Description JOB INFORMATION

78632 2 CUSTOMER TRIED TO USE THE FURNACE, BUT IT WILL COME ON FOR 3-4
SECONDS AND THEN IT GOES RIGHT BACK OFF.
Customer stated furnace runs for 4 seconds then goes off
After inspection of the furnace. I pulled the furnace from the
unit and tested the control board and the voltage and it worked
properly on the test table. So i put the furnace back in the
camper and turned it on and tested the voltage coming from the
thermostat and the voltage dropped all the way to 4 volts and it
needs 12 volts to function properly. So we have a bad thermostat.
Going to put a parts request in for a new one

78632 1 CUSTOMER ADVISES THAT THE WATER FLOW IS RESTRICTED IN THE KITCHEN
SINK. CALL 812-486-6067
Low flow at kitchen sink
Took faucet head off and cleaned out the fliter screens and it
flows properly. Put a jug of winterize solution and tested it
through the water pump with the solution.

78632 5 CUSTOMER ADVISES THAT THE SCREWS HAVE FALLEN OUT OF THE WALL THAT
HOLD THE DINING TABLE TO THE WALL.
Customer stated screws fell out of table brackets
After inspection of the table found the screws pulled out of the
wall. So i had to get larger diameter screws to fasten the table
brackets back to the wall. All good now
