 WO # Job # Description JOB INFORMATION

 78687 1 UNIT HAS RECALL ON HOLDING TANKS
 Fresh Tank recall
 Took the screws out of the underbelly under the fresh tank. And inspected the freash tank. And took pictures of the straps and they were 2- 1/2 wide straps on the fresh tank. There wasn't any brakes like the paper showed. Then i shot the screws back in the underbelly. The recall repair kit came in. So i took the underbelly section out. Noticed that the customer had winterize solution in the fresh tank so i had to drain it so there wasn't weight in the fresh tank. They sent 3 metel flat stock in the recall kit that i spaced out evenly under the freash tank and then i used self tappers to secure the meatal flat stock to the cross members of the camper. And then i had to put the second of the underbelly back in its place and got it secured like it was.
 Unit good to go now
