Job #1 - Warranty

COMPLAINT: UNIT HAS RECALL ON HOLDING TANKS

CAUSE: Fresh Tank recall

CORRECTION: Took the screws out of the underbelly under the fresh tank. And inspected the freash tank. And took pictures of the straps and they were 2- 1/2 wide straps on the fresh tank. There wasn't any brakes like the paper showed. Then i shot the screws back in the underbelly. The recall repair kit came in. So i took the underbelly section out. Noticed that the customer had winterize solution in the fresh tank so i had to drain it so there wasn't weight in the fresh tank. They sent 3 metel flat stock in the recall kit that i spaced out evenly under the freash tank and then i used self tappers to secure the meatal flat stock to the cross members of the camper. And then i had to put the second of the underbelly back in its place and got it secured like it was. Unit good to go now
