Job #1 - Warranty

COMPLAINT: FURNACE VENT RATTLES. CUSTOMER THINKS THE FAN ISN'T TURNING FREELY

CAUSE: Blower fan for the exhaust was not tighten to the motor

CORRECTION: Turned on the furnace then heard a rattle from the furnace. Turned off the furnace. Unscrewed the exterior cover to the furnace then disconnected the lp line and power to the furnace. Disconnected the furnace vent hoses. Pulled out the furnace to inspect. Disassembled the cover to the blower motor, found the little blower fan to the exhaust side was loose. Tightened the set screw and put the cover back on the blower motor. Check for clearance in the blower fan. Assembled the furnace and put it back in the camper. Connected the furnace vents, lp line and power. Tested the furnace again and it was quiet. Put the exterior cover back on.
