COMPLAINT: KITCHEN PANELING ON CABINET NOT ATTACHED

CAUSE: Walboard on side of kitchen cabinet is detached near the wall

CORRECTION: I tried to find a stapler that would fit in between the slide room wall and the cabinet. I could not find a stapler small enough. To prevent pulling the slide room apart, I opted for using silicone to hold the panel in place. I added silicone on the backside between the panel block and the paneling. I then sealed up the corner from the outside with clear silicone. I placed foam blocks between the slide room and the cabinet to hold overnight while the silicone cures. I checked the paneling in the morning and it is holding in place.

COMPLAINT: THE PRIVACY BLIND IN THE SLIDE ROOM FELL OFF OF THE WALL.

CAUSE: The screw holding the blind at the rear of the slide room window fell out of the paneling.

CORRECTION: I removed the valence over the blind mounting area. I found that this blind had 3 mounting holes and only 2 had been used. The far left screw had come out of the wall. I installed a center screw and I
